

XL Grapple

SWEDISH QUALITY AT AFFORDABLE PRICES

Our grapples are designed and produced in Sweden, and made by Swedish steel. XL Grapple is available in a total of eight variants: four standard grapples and four energy wood grapples.

XL GRAPPLE STANDARD

DXL Grapple Standard is our log grapple, available in sizes suitable for both thinning and clear cutting.

The grapple provides you with control over log handling and is designed in a way that ensures smooth timber rolling. This also minimizes the risk of the grapple digging into the ground and bringing along soil, peat, and other debris.

XL Grapple Standard is available in sizes 025, 028, 035 and 040.

XL GRAPPLE ENERGY

XL Grapple Energy is our energy wood grapple, designed for efficient handling of brushwood and other biomaterial.

The open, bladeless claws provide you with a strong grip on the material while allowing it to easily release from the grapple without getting stuck when you open it.

XL Grapple Energy is available in sizes 025, 028, 035 and 040.

Find the grapple best suited for your needs - order today!

TECHNICAL SPECIFICATIONS					
Model	type	025	028	035	040
Length, closed grapple	mm	800	833	890	975
Width, outer grapple	mm	394	394	415	415
Height, closed grapple	mm	534	524	561	605
Height, open grapple	mm	790	734	700	730
Max. grip width	mm	1 390	1 497	1 690	2 000
Min. grapple diameter	mm	100	100	115	135
Max. width	mm	452	452	497	497
Point force, tip to tip	kN	17	16,7	16,1	16,2
Max. working pressure	MPa	23	23	23	23
Opening time at 70 l/min	s	0,9	1,0	1,1	1,2
Closing time at 70 l/min	s	1,4	1,5	1,6	1,7
Max. load	kg	3 500	3 500	5 000	5 000
